wherever you ride

A uvex riding helmet is the perfect headgear for dressage, show jumping, or cross-country. Training, eventing, or leisurely hacking. Whether you opt for a traditional or more fashionable style, every uvex riding helmet offers a high-quality superior ventilation, and, of course, unbeatable safety.

For exceptional protection – 24/7, 365 days of the year – uvex is the go-to choice. Wherever you ride.

Hans-Dieter Dreher
Helmet uvex perfoxion II

uvex exxential II LED

The innovative uvex exxential II LED is the perfect companion on every road. From dawn to dusk and beyond. Invisible during the day, the integrated helmet lighting can be activated at any time at the push of a button.

uvex exxential II MIPS

When falling, the human brain can be exposed to strong rotational movements due to an oblique impact. The innovative height-adjustable MIPS (Multi-Directional Impact Protection System) cage – built into a uvex riding helmet for the first time ever – offers extensive protection.

uvex elexxion Tocsen

The revolutionary Tocsen sensor stores movement patterns and detects a fall from a horse with the highest precision. If the rider does not confirm that they are unharmed, an emergency call with the GPS data of the scene of the accident is automatically sent.

highlights

uvex technologies

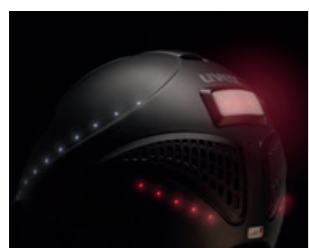

Whether for increased visibility, innovative and improved protection or a smart rescue system: uvex has integrated three new technologies into its riding helmets, taking the next step towards even higher safety in equestrian sports.

The uvex exxential II LED ensures optimal visibility in the forest and on country roads, especially in conditions like fog or early dusk. The uvex exxential II MIPS, which is identical in construction, has a safety system thanks to the integrated MIPS layer that absorbs dangerous rotational energy in the event of a fall. And the uvex elexxion Tocsen can save lives: it calls for help after a fall. The new uvex helmets not only impress with their integrated technology, but also with their design. Feeling safe has never looked more stylish.

An all-rounder

The uvex exxential II LED can do everything: the new helmet meets both the riding and cycling helmet standards. This means that riders who cycle to the stable are always perfectly protected.

31 LED Spots

The integrated LED spots, white on the sides and red on the back, showcase optimized visibility on busy roads and a high level of protection in traffic.

Smart and rechargeable

Thanks to the innovative magnetic adhesion system, the battery can be easily attached. Depending on use and lighting mode, the battery lasts between 6 and 12 hours.

highlights

uvex exxential II LED

The new uvex exxential II LED not only looks really good – it is a true eyecatcher. On the morning round or while riding in the twilight, past country roads or on busy streets. The new, sporty all-rounder is the first uvex riding helmet with innovative helmet lighting and the spoga horse TOP INNOVATIONS winner of 2021. An astounding number of 31 LED spots – integrated directly into the helmet – ensures extremely good visibility in the dark.

The lights are activated with just one push of a button and can easily be operated in three different lighting modes: constant, flashing or pulsing. The plug-in LED serves as an additional rear light on the back of the head – for more visibility even on horseback.

MADE IN
GERMANY

Tocsen Button

The Tocsen precision crash sensor fits perfectly on any helmet. The button can be attached quickly and easily behind the ear on the hard shell of the helmet and is immediately ready to use.

Tocsen helmet

Now available: the new uvex elexxion Tocsen riding helmet with the integrated Tocsen sensor and spoga horse TOP INNOVATIONS winner of 2021.

Tocsen App

Available for free, easy to use – and a strong, growing community as a backbone.

highlights

TOCSEN

Calls if you fall

Even if unaccompanied rides mean freedom – in an emergency, we need help from other people as soon as possible. With the revolutionary uvex Tocsen technology, there is now an additional partner, who, thanks to a precision sensor, can reliably detect falls and save lives.

If the sensor has registered a fall and does not receive any direct feedback from the rider, Tocsen automatically sends an emergency call including GPS data. Because professional help isn't always nearby, the system also feeds the emergency call into the constantly growing Tocsen community. Potential rescuers are informed via app and can go directly to the scene of the accident to provide first aid.

uvex elexxion pro

The uvex elexxion pro hybrid helmet is a real eye-catcher, wherever you ride. Dirt track or homestretch. High-quality detailing in matt, gloss, and chrome completes the classy design. The 3D IAS system guarantees a perfect fit on every head. The ventilation system is also adjustable, providing a cooling flow of air even on hotter days. Blue, brown or classic in black – the uvex elexxion pro makes a real statement. Made in Germany.

features

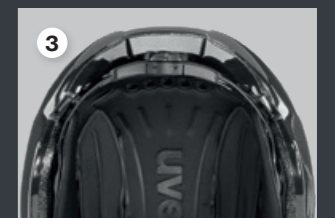

Ventilation system with chrome detailing

The ventilation system is individually adjustable to ensure optimal climate management, while the chrome detailing adds that extra wow factor.

Increased durability

The unique wrap-around EPS shell protects the edges of the helmet for increased durability, which means this helmet will look great for longer.

Slim fit inner lining

The removable and washable slim fit interior pads ensure the best possible comfort, while the height and width adjustable 3D IAS system ensures a perfect fit on every head.

uvex ceravent

Dusty trails on hot days. Rubber reins in heavy rain. Stay in control with the uvex ceravent. The innovative, moisture-control riding glove guarantees an optimum grip in all conditions, while the abrasion-resistant ceraspace™ ceramic coating offers extreme durability. The material on the fingertips also allows for easy operation of a smartphone touch screen.

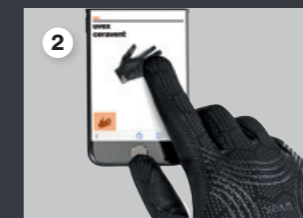

features

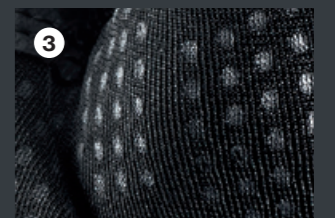

Short, athletic style

This shorter style sports glove has a snug, comfortable cuff and can be teamed with any riding outfit.

Touchscreen-sensitive

Light and grippy, but with touchscreen-sensitive capability. The pleasantly soft material on the fingertips makes the uvex ceravent a great choice for smartphone users.

ceraspace™ coating

The functional material has a ceramic coating for extra durability.

uvex ceravent

Super-short, sporty riding glove with an ideal fit

Extreme durability and minimal abrasion thanks to the ceraspace™ coating

Optimal grip, even when wet

Features

- 4D stretch
- Abrasion resistant
- Excellent grip
- Stretch venting
- Moisture management
- Touchscreen capability
- Washable (30°C)

Material

- Backhand: ceramic-coated stretch material (80% polyamide, 20% elastane)
- Palm: 100% polyurethane composition (70% polyurethane, 30% nylon)

tech summary

Helmets

Tested protection

Anyone who wears a uvex helmet travels on the side of safety. Each of our helmets undergoes rigorous tests in the uvex testing center.

Certified in accordance with

EN 1384:2012-02 + VG1 01.040 2014-12

Additionally GS tested

The voluntary test mark "GS" stands for *geprüfte Sicherheit* ("tested safety"). Find details about test criteria at: www.tuv.com

Shell materials

Outer material

PC inmould
Safety thanks to the strongly bonded PC shell.

ABS hardshell
Proven technology that has a hard shell for highly effective protection.

Inner material

EPS hardshell//inmould
Protective material made from microscopic air chambers that absorb the incident force of an impact.

Shell construction

Hardshell

The helmet has a molded outer shell and EPS inner shell for a most efficient safety combination: impact-resistant on the outside, shock-absorbing on the inside.

This complex construction allows for built-in air vents and air channels to be perfectly placed for exceptional wearing comfort.

Hybrid

Advanced technology unites the durable hard-shell construction of the upper helmet with the inmould process of the lower helmet.

Inmould

The protective EPS is foamed directly into the polycarbonate shell. For a lightweight helmet construction with the highest impact resistance and the perfect fusion of an EPS inner layer and a PC outer layer.

Fit

Shell sizes

Perfect fit = head shape + head circumference. Whether large or small, rounder or squarer: uvex has the perfect shell size, from 49 to 61 cm, for every head in its range.

Monomatic

The uvex monomatic comfort lock can be opened and closed with one hand.

uvex IAS

With the uvex IAS 3.0 system, helmets can be adjusted in width.

uvex 3D IAS

The uvex 3D IAS 3.0 system offers the extra feature of precise adjustment to individual head height.

FAS

Fast Adapting System straps can be easily and continuously tailored to precisely fit your head shape.

R-FAS

The Ring Fast Adapting System strap ensures extra stability and can be easily adjusted with its steel ring.

Comfort

Vent system

uvex places the highest value on optimal ventilation: cleverly designed ventilation channels draw fresh air in and expel warm air.

Removable lining

Basic pads
Removable and washable padding.

X-fit pads
High quality, structured material for improved ventilation. Removable, washable padding.

X-vent pads
High quality moisture-wicking material with embossed ventilation channels. Comfortable on the skin, quick-drying, removable and washable.

Gloves

Material

Polyurethane

- Polyurethane-coated nylon
- Durable
- Breathable
- Excellent grip
- Touchscreen compatible
- Machine washable up to 30°C

Nylon stretch

- High-stretch material for the back of the hand
- Soft and conforming
- Breathable
- Machine washable up to 30°C

Ceramic-coated

- Abrasion resistant
- Elastic
- Antipilling
- Moisture management
- Fast drying
- Machine washable up to 30°C

Fit

Glove sizes

uvex glove sizes are based on the standard French glove sizing system. Available in half sizes to ensure the perfect fit for every hand shape and size.

Half sizes

model	sizes
uvex ceravent	6.5-10.5
uvex i-performance 2	6-11
uvex sportstyle	5-11
uvex sportstyle winter	5-11
uvex sportstyle kid	4-6.5
uvex sumair	6-11
uvex tensa II	7-11
uvex sportstyle diamond	6-9
uvex crx700	6-10.5

model	sizes
uvex ventraxion	5-6
white sizes only	6-7
up to size 9-10	7-8
	8-9
	9-10
	10-11

Stretch

uvex equestrian gloves mold to the hand like a second skin. High stretch and great ventilation for the best connection between you and your horse.

2D-Stretch

An elastic strap, held in place with zigzag stitching, provides stretch in two directions.

4D-Stretch

Stretchy fabric inserts provide stretch in every direction.

Comfort

Grip

uvex uses materials with an extremely high grip surface, ensuring reins always feel secure in the hand. Whether conditions are wet or dry, the horse can be reliably led at all times.

Ventilation

Flexible fabric inserts made from lightweight stretch material, plus perforations on the fingers, allow sweat and moisture to evaporate before they have a chance to build up in the glove.

Reinforced

Double layers of material are particularly hard-wearing. Low-stress areas have a single layer of material, for maximum sensitivity.

Touchscreen-compatible

Open-pored material at the fingertips on many uvex riding gloves allow the rider to comfortably feel the reins, and making the gloves touchscreen-compatible.

Mission and responsibility

Our aspiration: "Made in uvex"

The sustainability goals of the uvex group include the following areas of responsibility: ecology, economy, working conditions and human rights, employees and society as well as product. A particular focus here is on the expansion and modernization of our production facilities. When our customers choose uvex, we want to be sure that our products meet our high quality standards. We ensure this with our principle "Made in uvex": From the product idea and development to production and sales, the entire value chain is in our hands. Carried out and supported by our own production facilities, many of them in Germany and Europe.

Now and in the future: uvex for CO₂ neutral growth

We have set ambitious goals, particularly in the area of CO₂ reductions, and we are aiming for CO₂-neutral growth in the near future. In the past four years, the uvex group has already demonstrated that this goal is not just a vision: thanks to our sustainability efforts, the company's CO₂ emissions were significantly reduced. In some plants, up to 63 % CO₂ has been saved since 2016. A development with which we want to set an example in the industry. For our future – protecting people.

protecting people

We have been producing and selling high-quality products for the protection of people in sport, leisure and work for 95 years. And if you want to protect people, you have to take responsibility. It is precisely from this mission that our obligation derives to act in a sustainable, social and socially-responsible manner.
